Contents Volume 65

Feature Issue on Multiobjective Design of Transportation Networks

1 Multiple objectives in transportation network design and routing
J. Current

4 Multiobjective transportation network design and routing problems: Taxonomy and annotation
J. Current and M. Marsh

20 Indirect covering tree problems on spanning tree networks
V.A. Hutson and C. ReVelle

33 Multiobjective routing of hazardous materials in stochastic networks
A.B. Wijeratne, M.A. Turnquist and P.B. Mirchandani

44 The multiobjective equilibrium network design problem revisited: A simulated annealing approach
T.L. Friesz, G. Anandalingam, N.J. Mehta, K. Nam, S.J. Shah and R.L. Tobin

58 Interactive decision support for multiobjective transportation problems
J.N. Clímaco, C.H. Antunes and M.J. Alves

68 Further results on the probabilistic traveling salesman problem
D. Bertsimas and L.H. Howell

96 Safety stock allocation in a two-echelon distribution system
H. Tempelmeier

118 Exact analysis of production lines with no intermediate buffers
H.T. Papadopoulos and M.E.J. O'Kelly

138 Limits on the analytic hierarchy process from its consistency index
C.K. Murphy

140 The OR/MS contribution to maintenance management. Comment on "Maintenance management decision making"
R.J. Ormerod

143 OR Software
H.Thiriez (ed.)

145 Short Book Reviews
L.F. Gelders (ed.)

147 Facility siting and integer-friendly programming (*Invited Review*)
C. ReVelle

159 Multi-level lot-sizing in a rayon yarn company: A case study
A. Gunasekaran, S.K. Goyal, T. Martikainen and P. Yli-Olli

175 Inventory models with general backorder costs
F. Chen and Y.-S. Zheng

187 A due date assignment algorithm for multiproduct manufacturing facilities
H. Luss and M.B. Rosenwein

199 Note on utilizing stochastic optimal control in aggregate production planning
C.E. Love and M. Turner

207 The controlled rounding problem: Complexity and computational experience
J.P. Kelly, B.L. Golden and A.A. Assad

218 The maximum benefit chinese postman problem and the maximum benefit traveling salesman problem
C. Malandraki and M.S. Daskin

235 Choice of the best time scale for system reliability analysis
K.B. Kordonsky and I.B. Gertsbakh

247 Tandem behavior of a telecommunication system with repeated calls: II, A general case without buffers
B. Pourbabai

259 Machine interference problem with a random environment
J. Sztrik and B.D. Bunday

270 Sample path properties of the G/D/m queue
M.C. Fu and J.-Q. Hu

274 Computational experience with an optimal procedure for the scheduling of activities to maximize the net present value of projects
W.S. Herroelen and E. Gallens

0377-2217/93/$06.00 © 1993 – Elsevier Science Publishers B.V. All rights reserved

278 Osipov: The 'Russian Lanchester'
R.L. Helmbold
OR Software
H. Thiriez (ed.)

Feature Issue on Nonlinear Programming Algorithms

291 Editorial
I. Maros
292 Some experiments on heuristic code selection versus numerical performance in nonlinear programming
K. Schittkowski
305 A software system for multiextremal optimization
V.P. Gergel
314 The impact of accelerating tools on the interval subdivision algorithm for global optimization
T. Csendes and J. Pintér
321 Quadratic convergence of an extrapolation method
I. Kun
327 Quasiconvex first-order approximations and Kuhn–Tucker type optimality conditions
S. Komlósi
336 A mathematical model and a heuristic procedure for the turbine balancing problem
Y. Fathi and K.K. Ginjupalli
343 On using LP to collision detection between a manipulator arm and surrounding obstacles
R. Gallerini and A. Sciomachen
351 Sensitivity and parametric bound analysis for a single pass machining problem
S.M. Yacout
362 A mixed-integer programming model for a class of assortment problems
C.-S. Chen, S. Sarin and B. Ram
368 A branch-and-bound method for multicommodity location with balancing requirements
T.G. Crainic, L. Delorme and P. Dejax
383 Lagrangean heuristics for location problems
J.E. Beasley
400 Group centre and group median of a tree
S.K. Gupta and A.P. Punnen
407 A convex form of the quadratic assignment problem
D.J. White
417 Dorn's duality for quadratic programs revisited: The nonconvex case
H.D. Sherali
425 Contents Volume 65
